

10-100  
Regular Set

10-105  
Heavy-Duty Set

## PRODUCT DESCRIPTION

### Regular Set

Rail pointer set for accurate alignment of elevator rails. The set comes complete as shown and ready to be fastened to 3/4" EMT conduit (not included) using the included U-bolts. The gauges are fastened to the conduit to establish the distance between the guide rails (DBG).

As you move through the hoistway, set DBG at the same time you set rail faces in correct relationship to each other.

The set is made from lightweight aluminum for easy handling. The adjustable gauge is made from stainless steel for durability.

### Heavy-Duty Set

The heavy-duty rail pointer set is built of durable aluminum stock and designed to last. The clamping blocks fit 1" EMT conduit (not included). The gauges are fastened to the conduit to establish DBG.

As you move through the hoistway, set DBG at the same time you set rail faces in correct relationship to each other. The longer pointer is mounted on a ball bearing with an easily adjustable alignment gauge.
