

Model 1260E

Switch guard protects the control switches from possible damage.

Three strong "grab points" to make handling the stair climber easier.

3/4" drive screw will not bow - even with loads of up to 1500 pounds.

Lectro-Truck nameplate means you get 35 years of product experience.

Two adjustable strap bars allow user to adjust specifically to each load.

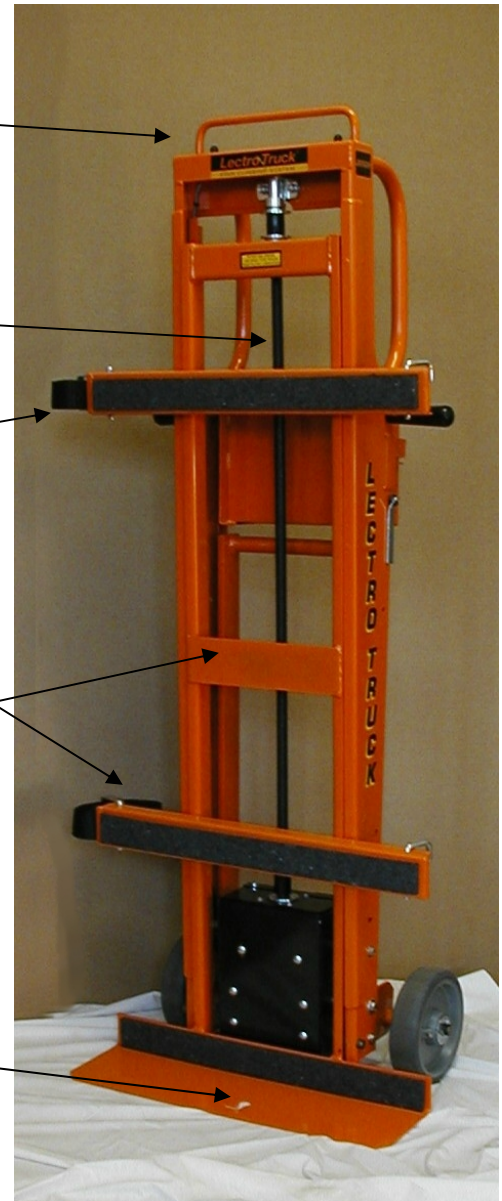

Leverage bar enables the user to be able to move the heaviest of loads.

Electric Brake stops the drive screw even when loaded to capacity.

Heavy duty steel construction makes the unit very durable.

1-1/2 Hp motor provides the lifting power you need to move up to 1500#.

24" Toe plate width to make moving in commercial or residential areas easier.
