

10-110
Rail Pointer Set, Realignment

Rail Pointer Set, Realignment (10-110) &
Adjustable Plumb Line Clamp (10-180)
In Context

PRODUCT DESCRIPTION

The Rail Pointer Set, Realignment from Wurtec offers a simple method for measuring the distance between guide rails (DBG).

The conduit is offset 8" (20.2 cm) to avoid the wire ropes and ensure easy tool placement.

Simply fasten the conduit to the gauges on the mounting plates, then place the plates against the rails. Verify the rail alignment by sliding the tool down the rail.

KEY FEATURES

- 8" (20.3 cm) conduit offset for easy placement
- Lightweight design (5.5 lbs | 2.0 kg)
- Built-in, adjustable plumb line gauges

*NOTE: This tool requires the use of 1" EMT conduit, which has an outer diameter of approximately 1.16" or 29.5 mm.
