

11-302
Power Distribution Box

	11-302
Phases (Φ)	3
Maximum Current	60A
Number of Poles and Wires	4P, 5W
Inlet Part Number	560B7W
Hoist Connector P/N	HBL2420
Welder #1 Receptacle P/N	460R7W
Welder #2 Receptacle P/N	HBL9367
GFCI Duplex P/N	HBL5362
Input Cable & Connector P/N	10045856
Weight (lbs.)	13.8
Dimensions (LxWxH)	17" x 8" x 6.5"

PRODUCT DESCRIPTION

Wurtec's Power Distribution Box provides a centralized, multipurpose electrical connection point for false cars, work platforms with hoist machines, and car slings during new elevator installations and modernization projects. Designed to simplify temporary power distribution, it offers a convenient solution for organizing essential electrical connections on the jobsite.

The 11-302 Power Distribution Box is designed specifically for Schindler applications.

KEY FEATURES

- Centralized electrical connection point for temporary jobsite power
- Compatible with False Cars, work platforms with hoist machines, and car slings
- Ideal for new installations and modernization projects
- Durable, multipurpose design for a variety of field applications
- Model 11-302 designed specifically for Schindler equipment
