

MACHINE LIFT CART

Part No. 80-013

DESCRIPTION

This **Machine Lift Cart** is designed to lift an elevator machine from the floor onto a machine platform in the elevator machine room. The Machine Lift Cart provides a wheel-mounted platform to mount the machine for quick transport across flat, level surfaces. A set of forklift forks engage the cart and are lifted up to 42" off the ground via a stand-alone hydraulic system built into the lift frame. The lift frame is intended to be anchored to the floor to provide a stable lifting framework.

Specifications

- Lift capacity: 4000 lbs (1814 kg)
- Minimum hydraulic power requirements:
 - Lift-hold-lower capacities
 - 2900 PSI, 1 gal. reservoir capacity
