

CAR TOP GUARD RAIL

■ Product Description

Wurtec's car top guard rail is a safety rail that replaces the safety chain on your top-of-car handrail. The rail has a telescoping function allowing it to adjust from 55-1/4" to 88-1/8" long.

A hinged clamp on one end secures to the top-of-car handrail with a thumbscrew and allows the guardrail to be raised or lowered.

The other end secures to the handrail with either a magnetic bracket (part no. 18-401) or a thumbscrew (part no. 18-402).

The thumbscrew end assembly (#15-10061330) is also available for separate purchase.

Part No.	Description
18-401	Car Top Guard Rail w/ Magnetic End
18-402	Car Top Guard Rail w/ Thumbscrew End
15-10061330	Thumbscrew Assembly
