

RAIL ALIGNEMENT GAUGE

10-117
5/8" gauge

10-117
In context

PRODUCT DESCRIPTION

Use the **dual-line rail alignment gauge** to align rails to the target lines dropped using either the **dual-line ratchet bracket (#10-182)** or the **precision dual-line ratchet assemblies (#10-280 with #10-281, #10-282, #10-283, or #10-284)** depending on the rail sizes.

This gauge is see-through to facilitate easy viewing of the line. It comes with a spring action clamp so that the bracket can be secured to the rail, allowing for hands-free adjusting.

Part No.	Rails	Description
10-117	T114/B T127-1/B T127-2/B	5/8" Rail Alignment Gauge
10-118	T140-1/B	3/4" Rail Alignment Gauge
