PACKING LIST

EQUIPMENT DESCRIPTION & INTENDED USE

The **False Car Tool Rack** is a convenient storage space for tools, hardware, and other equipment used on the False Car. It is intended to be used on Wurtec False Cars only. The above packing list is a starting kit and is adjustable depending on the needs of the users.

INSTALLATION / ASSEMBLY TOOLS REQUIRED

The following items are required to install the V2 False Car Tool Rack:

- Metric allen key size 6;
- Metric socket size 10, 13, & 19;
- Ratchet wrench;
- Metric wrench size 10, 13 & 19.

SECTION A: INSTALLATION

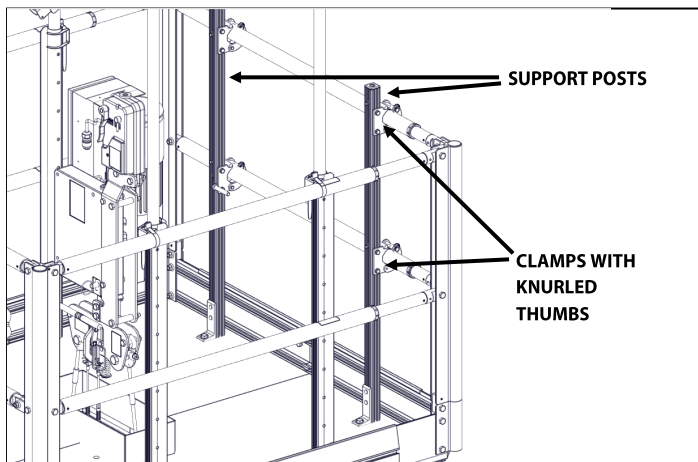

Image 01. Support posts mounted to handrails.

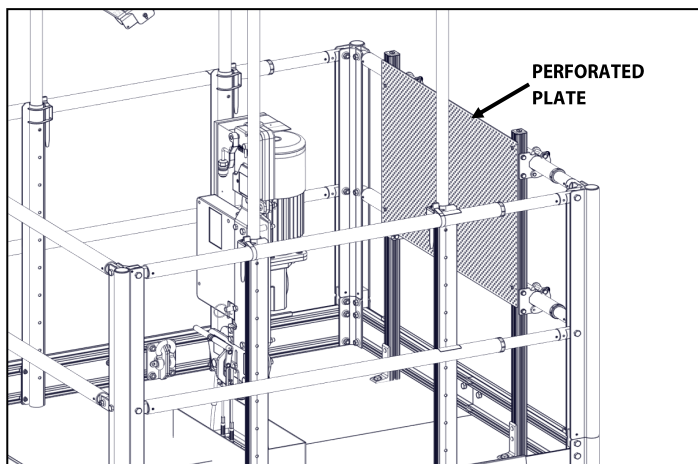

Image 02. Perforated plate mounted to support posts.

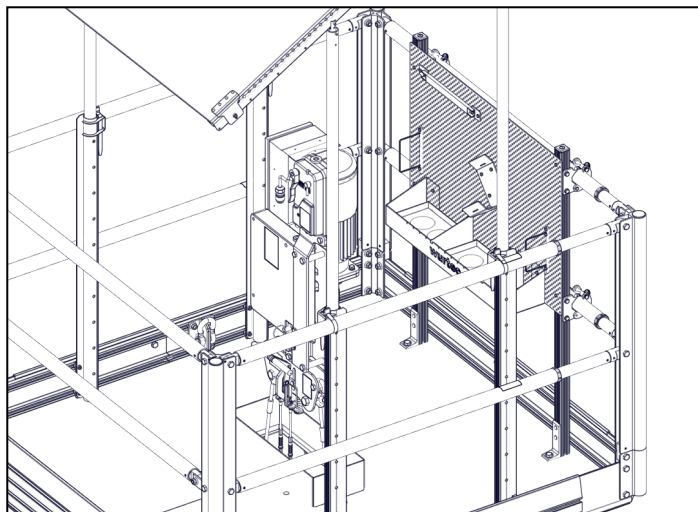

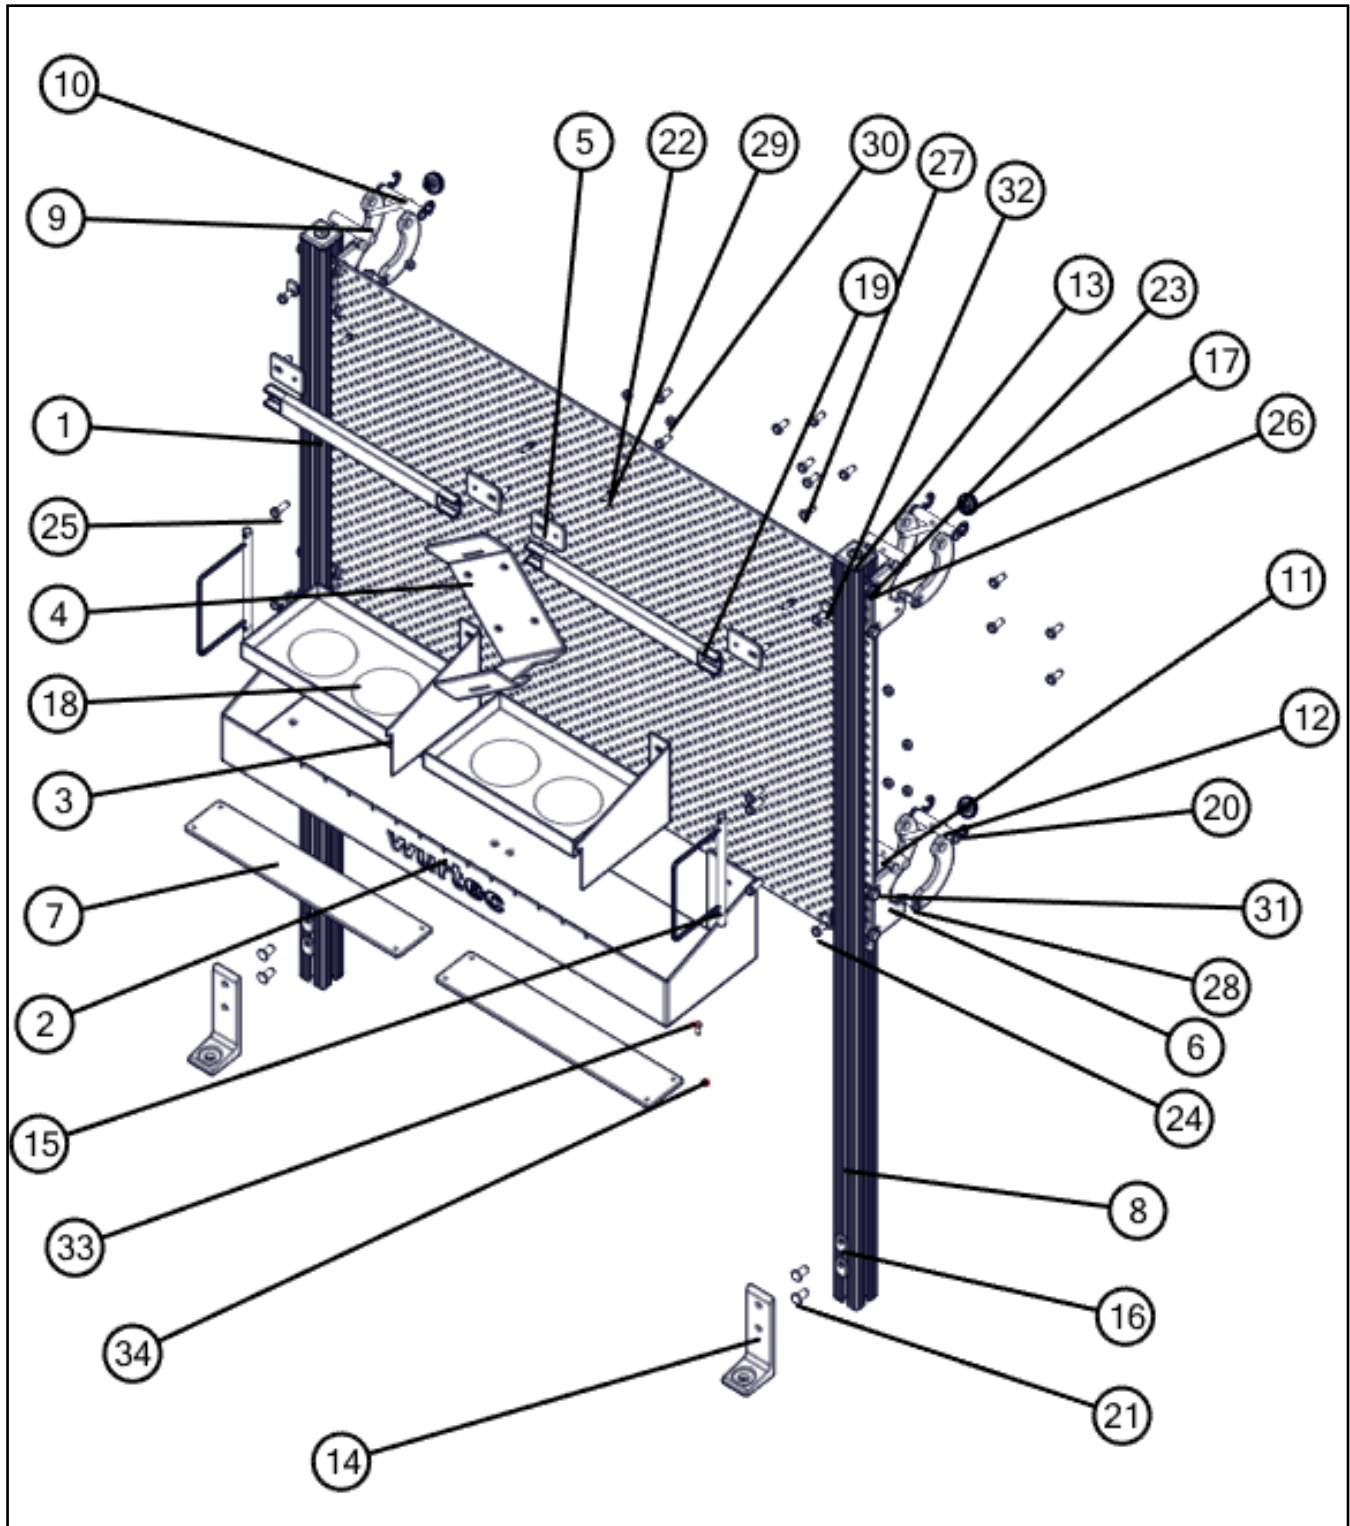

Image 03. Kits & brackets mounted to plate.

- Using knurled thumbs on the clamps, loosely clamp the (2) posts of the V2 handrail support kit to the handrails. An ideal distance between the (2) posts is between 32" and 34".
- Mark the location of the support posts on the platform plywood through the clearance holes of the L-shaped feet of the posts. Move the posts aside. Drill holes through the plywood.
- Move the posts back. Tighten the screws and nuts at the bottom. Tighten the knurled thumbs to secure the support posts to the handrails.
- Mount the perforated plate on the (2) posts. Secure with the M6 hex head cap screws and the t-nuts located inside the posts.
- Mount the different kits and brackets to the perforated plate using M6 hardware provided.
- All kits & items on the plate can be moved around and configured as desired or needed by the users.
