

TEMPORARY ESCALATOR STEPS

18-521

latching mechanism w/
pull-string release

18-521

Product Description

Wurtec's temporary escalator steps securely hook and latch to an escalator step axle. Each step can be folded upright to be near level, providing the mechanic with a safe, stable environment and eliminating the need to stand directly on the axles.

Specifications

- **Width:** 16-3/8"
- **Height:** 65-3/4"
- **Depth:** 5"

Key Features

- Positive latching with pull-string release
- Made of durable lightweight components (only 32 lbs)
- Works with most escalators
- Replaces multiple steps for more stable footing
- Allows room to work on both sides
- Multiple units can be used at once
