

Main Rail Alignment Tool ■ Product Description

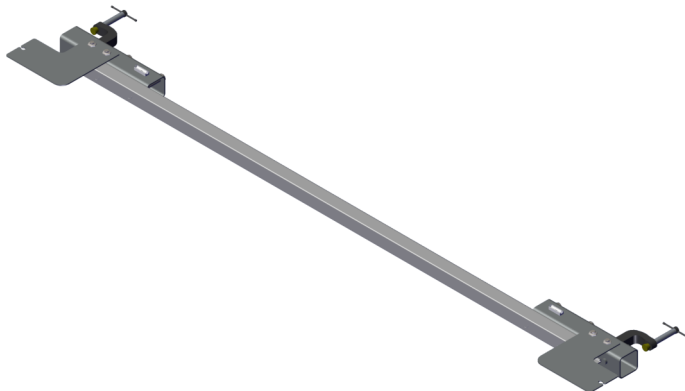

Wurtec's Main Rail Alignment Tool can be used to align rails up to 1-1/4" (31.74 mm) face width. Just add a piece of Unistrut from the jobsite and adjust to any DBG. The gauge features weld slag proof "C" clamps on each end, attachment holes for customer supplied unistrut, adjustable templates for piano wire locators, and bubble level on each end.

Part No. 10-129

Features

- Weld slag proof "C" clamps on each end
- Attachment holes and hardware for customer supplied unistrut
- Adjustable templates for piano wire locators
- Bubble level on each end
- Set DBG by cutting unistrut to length and attaching gauge on each end
- Center is left open to avoid interference with belts and ropes
