

90-10057468
Governor Rope Clamp

PRODUCT DESCRIPTION

The Wurtec Governor Rope Clamp provides a safe and reliable method for securing elevator governor rope during Category 5 testing. The clamp holds the wire rope firmly in place while technicians perform required test procedures, helping improve control and confidence during setup and operation.

Designed for straightforward field use, the clamp features an adjustable clamping mechanism, a round handle for a secure grip, and a hex head cap screw tightened to 30 ft-lbs. A torsion spring maintains tension through the opening and closing motion, supporting smooth, repeatable operation.

KEY FEATURES

- Secures governor rope during Category 5 testing
- Clamp jaw holds the wire rope in position.
- Adjustable clamping tab supports proper rope engagement.
- Hex head cap screw tightens to 30 ft-lbs.
- Hex jam nut locks the cap screw in place.
- Round handle provides a secure hand grip.
- Torsion spring maintains tension during operation.
- Button head screws secure the clamp assembly.
