

10-182
Dual-Line Ratchet Bracket

PRODUCT DESCRIPTION

Wurtec's Dual-Line Ratchet Bracket provides a fast, reliable solution for positioning and tensioning two independent target lines during elevator rail alignment. Designed for easy installation, the bracket mounts to the back of the rail or directly to the pit channel using standard rail clips and hardware. An integrated ratchet tensioning mechanism allows for quick, consistent line tension, improving setup efficiency and alignment accuracy.

KEY FEATURES

- Positions and tensions two independent target lines
- Target lines are located 1/4 in. (6.35 mm) or 5/8 in. (15.875 mm) behind the back of the rail and spaced 14 in. (355.6 mm) or 16 in. (406.4 mm) apart
- Integrated ratchet mechanism enables fast, repeatable line tensioning
- Mounts to the back of the rail or pit channel using standard rail clips and hardware
- Compatible with 5/8 in. (16 mm) and 3/4 in. (19 mm) rails
- Lightweight design weighing 10.21 lb (4.63 kg)
