

13-100
Music Wire

PRODUCT DESCRIPTION

Wurtec **Music Wire** is a high-strength, high-carbon spring steel wire designed for precision elevator guide rail alignment. When tensioned between the top of the hoistway and the pit, it provides a straight, stable reference line that mechanics use to accurately position and align guide rails during installation and modernization projects

Engineered for excellent tensile strength and minimal stretch, Wurtec Music Wire maintains alignment accuracy over long vertical distances. Available in multiple spool sizes and two wire diameters, it delivers the durability and reliability required for professional elevator rail layout and alignment.

KEY FEATURES

- Manufactured from high-strength, high-carbon spring steel for excellent tensile performance
- Provides a straight, stable reference line for accurate guide rail alignment.
- Resists stretching to maintain alignment accuracy throughout the hoistway.
- Suitable for long vertical drops in elevator shafts
- Compatible with standard plumb bobs, tensioning brackets, and rail alignment gauges.
- Available in multiple spool sizes to suit a variety of project requirements.
- Offered in both 0.029 in. and 0.024 in. diameter wire options.

Part No	Diameter	Gauge	Weight	Length
13-100	0.029 in	12-Gauge	1-lb Spool	440 ft
13-110	0.029 in	12-Gauge	3-lb Spool	1320 ft
13-120	0.029 in	12-Gauge	5-lb Spool	2200 ft
13-140	0.024 in	10-Gauge	1/4-lb Spool	162 ft
13-141	0.024 in	10-Gauge	1-lb Spool	650 ft

**NOTE: Length is approximate*
