Elevator Door Lifting Handles

Attach Handles To Elevator Door

Team Lift on Either End

PRODUCT DESCRIPTION

The Wurtec **Elevator Door Lifting Handles** provide a safer, more ergonomic way to lift and transport elevator doors during installation, maintenance, and modernization. Constructed from lightweight aluminum, the handles attach securely to each end of the door, giving technicians a comfortable grip while reducing hand strain and improving control during lifting operations.

Designed for quick installation, the slotted mounting accommodates virtually any elevator door size, making the handles a versatile addition to any field service toolkit. Sold as a pair, they help protect fingers and knuckles from injury while making door handling faster, safer, and more efficient.
