

SHORTENING CLAMP KIT

Product Description

Wurtec's shortening clamp kit is an all-in-one kit designed for wire rope shortening. It includes lightweight aluminum rope clamps that securely grip the wire ropes and a lifting bar that provides a safe hitching point for chain hoists.

The kit includes:

8- Rope Kit

- 4 - Rope Clamps
- 1 - Lifting Bar

10- Rope Kit

- 5 - Rope Clamps
- 1 - Lifting Bar

In certain applications, reaching the required torque might be difficult. The use of Wurtec's Spanner Wrench (#60-10040479) is highly recommended to help attain leverage.

Lifting Bar In Context

When using the Rope Clamps side-by-side, the resulting rope spacing will likely be greater than that of the elevator hitch plate. Manual repositioning of the ropes may be required to position them in the clamps. This, however, does not affect the capacity of the Rope Clamps or the Lifting Bar.

8-Rope Shortening Clamps						
Kit Part No.	Rope Clamp Part No.	Rope Size (in)	Rope Size (mm)	Capacity (lbs–kg)	Rope Spacing In-Clamp (in - mm)	Rope Spacing Between– Clamps (in - mm)
