

COUNTERWEIGHT STACKING PINS

11-440
Counterweight Stacking Pins, Pair

11-440
In Context

PRODUCT DESCRIPTION

Wurtec's Counterweight Stacking Pins provide a safer, more efficient method for installing elevator counterweights while reducing the risk of hand and finger injuries. Designed for use in pairs, the pins temporarily support the counterweight, allowing it to be lowered into position before being easily removed for a controlled installation.

Each pin features powerful magnets to securely hold it against the frame or counterweight, while large angled grips keep hands clear of pinch points and provide a comfortable grip, even when wearing gloves.

KEY FEATURES

- Safer method for installing elevator counterweights
- Reduces the risk of hand and finger injuries
- Powerful magnets securely hold pins in place
- Large, angled grips accommodate most gloved hands
- Sold and used in pairs for controlled weight positioning
