

PR1500

1500 KG Lift Point Capacity Tester

PRODUCT DESCRIPTION

The Wurtec **Lift Point** Capacity Tester provides a simple and reliable method for verifying the load capacity of lift points used during elevator installation, modernization, and maintenance. Installed between a lift point and a test load, the tester is engineered to fracture at a predetermined load, providing clear confirmation that the lift point can safely support the specified working load.

Available in three capacity ratings, each tester is permanently marked with its designated test load for quick identification. This controlled breakaway design offers an accurate way to validate lift points with unknown or unlabeled capacities, helping improve safety and confidence during lifting operations.

KEY FEATURES

- Verifies lift point load capacity.
- Breaks at the designated test load.
- Available in three capacity ratings.
- Clearly marked with the test capacity.
- Validates unlabeled or unknown lift points.
- Provides accurate, repeatable testing.
- Improves lifting safety and confidence.

ORDERING INFORMATION

Part Number	Minimum Breaking Force (kg lbs)	Maximum Working Load (kg lbs)
PR1500	1500 3306	1000 2204
PR2600	2600 5732	2000 4409
PR3250	3250 7165	2500 5511
