Hydraulic Piston Clamp

PRODUCT DESCRIPTION

Introducing Wurtec's **Hydraulic Piston Clamp** - the next generation of hoisting solutions for elevator installations. Part of our newly re-designed line of piston clamps, this heavy-duty tool is built to safely and securely hoist elevator pistons, replacing outdated, risky methods like hardwood blocks.

With a rated capacity of 1800 lbs., this clamp is designed to handle your most demanding jobs. It supports piston diameters from 4" to 10", offering compatibility across a wide range of installations.

Includes Socket

KEY FEATURES

High-Capacity Design

- Rated for loads up to 1,800 lbs.
- Accommodates 4"–10" diameter pistons

Adjustable & Easy to Use

- Removable positioning handles
- Locking lynch pins for quick handle removal
- Includes torque socket for Acme nut adjustment
- Compact, durable design
- Handles are intended for piston positioning only.

Improved Installation Safety

- Provides a stable, purpose-built alternative to makeshift methods
- Designed to support safer piston installation and positioning

Specifications

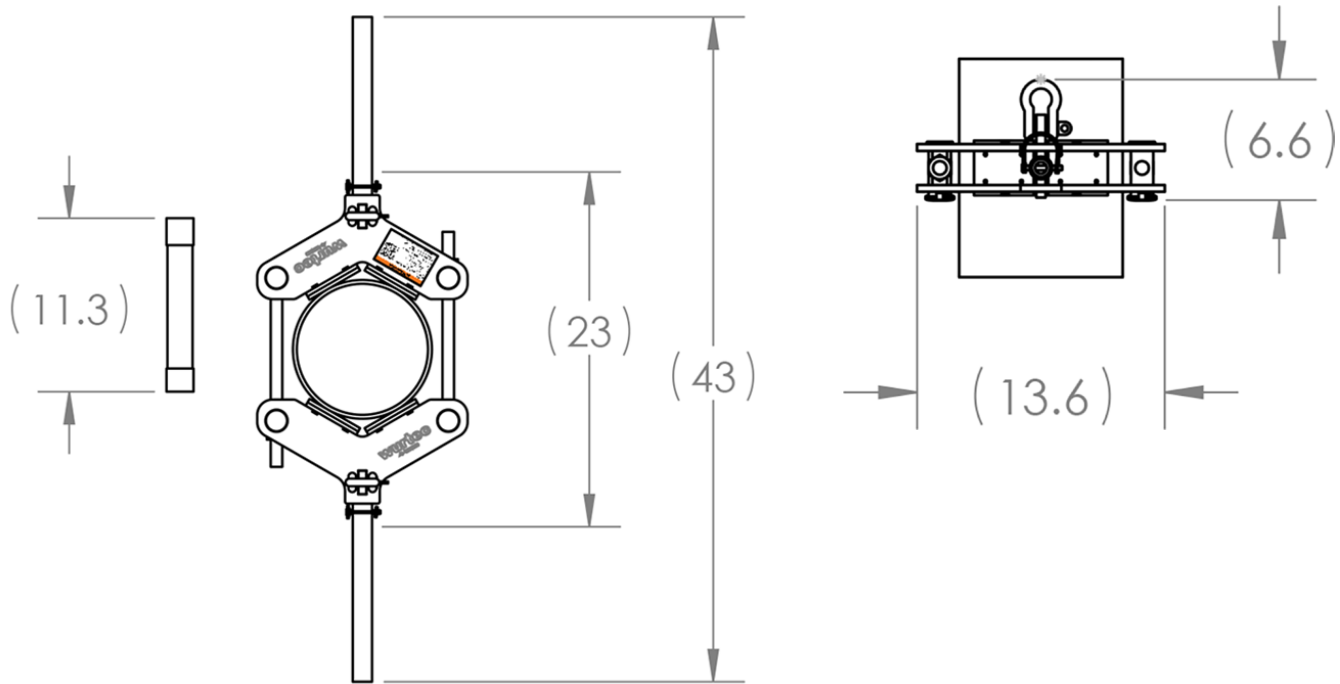

- Capacity: 1,800 lbs.
- Piston Diameter: 4"–10"
- Included: Torque socket for Acme nut adjustment
