

GUARDIAN HAND HELD FILTER SYSTEM

10-420
Guardian Hand Held Filter System

PRODUCT DESCRIPTION

The Guardian Hand Held Filter System is a lightweight, portable solution for filtering and transferring hydraulic fluid in the field or shop. Weighing just 28 lb (12 kg), this durable unit handles a wide range of fluid viscosities at flow rates up to 4 GPM. Constructed from rugged cast aluminum and powered by a 1/4 hp, 110 VAC motor, the system features an internal relief valve and ensures that only filtered fluid is delivered downstream. A variety of filter options are available to remove dirt, metal particles, and water, helping extend hydraulic system life and improve fluid cleanliness.

KEY FEATURES

- Lightweight, portable design weighing 28 lb (12 kg)
- Handles a wide range of hydraulic fluid viscosities with flow rates up to 4 GPM
- Rugged cast aluminum construction with a 1/4 hp, 110 VAC motor
- Internal relief valve provides reliable, protected operation
- Delivers only filtered fluid downstream
- Compatible with filters designed to remove dirt, metal particles, and water
