Part Number	Description	Weight (lbs kg)
10-700	Door Pressure Gauge, 0-35 lbs (0-15.9 kg)	0.16 lbs 0.07 kg
10-701	Door Pressure Gauge, 0-7 lbs (0-3 kg)	0.10 lbs 0.05 kg
10-700N	Door Pressure Gauge, 0-155 Newtons (0-35 lbs)	0.15 lbs 0.06 kg

PRODUCT OVERVIEW

The Wurtec Door Pressure Gauge is designed to accurately measure elevator door closing pressure, allowing technicians to quickly verify and adjust door operation for safe, code-compliant performance. Its compact, handheld design provides a simple and repeatable method for checking door closing force during installation, maintenance, and inspection.

Available in multiple force ranges, the Door Pressure Gauge can also be used to measure belt tension on hydraulic elevator pumps and door operators, making it a versatile diagnostic tool for elevator service technicians. Lightweight and easy to use, it provides reliable force measurements for a variety of field applications.

KEY FEATURES

- Measures elevator door closing pressure.
- Helps verify safe, code-compliant door operation.
- Available in multiple force ranges.
- Also measures belt tension on hydraulic pumps and door operators.
- Compact, lightweight handheld design.
- Provides accurate and repeatable force measurements.
- Simple to use in the field.
- Ideal for installation, maintenance, and inspection.
