

10-750
File, Rail (8 Tpi, 14")

10-760
Wood File Handle

10-761
Metal File Handle

PRODUCT DESCRIPTION

Wurtec's 14 in. (356 mm) Rail File is manufactured from premium hardened steel to provide reliable performance when dressing elevator guide rail joints and escalator step wheel tracks. Featuring 8 teeth per inch (25.4 mm), the file produces smooth, precise finishes that help promote quieter operation and improved ride quality.

The Rail File is available with two handle options:

Wooden Handle (10-760)

Crafted from smoothly finished wood, this ergonomically shaped handle provides a comfortable, secure grip for extended use. Compatible with the 14 in. Rail File (10-750 or 10-751).

Metal Handle (10-761)

This flexible metal handle can be adjusted to curve the file inward or outward, making it ideal for specialized filing applications. Compatible with 12 in. (305 mm) and 14 in. (356 mm) files.

KEY FEATURES

- 14 in. (356 mm) hardened steel rail file with 8 teeth per inch (25.4 mm)
- Ideal for dressing elevator guide rail joints and escalator step wheel tracks
- Available with either an ergonomic wooden handle (10-760) or an adjustable metal handle (10-761)
