PRODUCT DESCRIPTION

The Wurtec door stop is essential to any field technician's toolkit. It is designed to create a mechanical wedge to prevent manual door movement. The door stop is compact, secure, and easy to use - just insert into the sill groove, contact the door edge, and pivot the lever forward.

We offer two designs: 10850, the standard size, and 10-851, a narrower version.

Part No.	Description	European Conformity
10-850	Mechanical wedge to prevent manual door movement, 1/2" (12.7 mm) wide	CE
10-851	Narrow version of the door stop, 3/8" (9.525 mm) wide	CE
