

My Te 100AB Electric Winch

Description

Each My-Te winch hoist is constructed using the highest quality components and best workmanship. Machine cut gearing and premium quality bearings deliver energy efficiency and rapid cable travel as they maximize power to the drum. Further, sealed gear housings and welded steel frame construction provide long service life with minimal maintenance. 1000 lb. (454kg) capacity at 20 Ft/Min (6m/Min).

Key Features

- 1,000-lb single-line or 2,000-lb double-line lift
- Trifecta system 115 Volt brake motor with triple brake system for instant stopping
- Worm gear reduction for positive load holding
- Rugged construction
- Low voltage 10' pendant control
- High-capacity cable drum
- Frictionless bearings

Part no. 100AB

Part No.	Capacity (lbs.)	Traveling Speed
100AB	1000 lbs. (454 kg) 15V DC	20 FPM (6 m/min)
10-12	1000 lbs. (454 kg) 12V DC	20 FPM (6 m/min)

Part no. 10-12
