

15-400

PRODUCT DESCRIPTION

Wurtec's Door Simulator is a portable training aid designed to teach safe hoistway access techniques in a controlled environment. Replicating the components commonly encountered when accessing a locked hoistway door, it provides technicians with realistic, hands-on training without requiring access to an active elevator installation.

Built with a heavy-duty steel frame, the Door Simulator features a compact footprint for easy storage and integrated locking casters for convenient mobility between training locations.

KEY FEATURES

- Simulates a locked hoistway door for realistic training
- Heavy-duty steel frame with built-in locking casters for portability
- Includes galvanized door, aluminum sill, drawer-slide hanger, and nylon gibs
- Door panel with release keyhole and emergency release chain
- Keyed access box and hoistway access key switch
- Equipped with a Spirator-type closer and hall push button station
