

603877
MANILA WOOD BLOCK

PRODUCT DESCRIPTION

The Crosby 6 in. HS-21-B Manila Wood Block is a standard-duty rigging block designed for use with 3/4 in. manila rope. Its traditional wood construction, laser-cut steel sideplates, and becket provide a dependable solution for rope-handling and material-moving applications.

Built for durable field performance, the block features bronze-bushed sheaves with an enlarged bearing diameter to help extend service life. Grade 5 bolts, lock washers, and staked nuts secure the assembly, while compliance with ASME B30.26 supports use in applicable rigging operations.

KEY FEATURES

- Designed for use with 3/4 in. manila rope.
- Standard-duty wood block construction.
- Laser-cut steel sideplates provide added durability.
- Bronze-bushed sheaves support extended block life.
- Grade 5 bolts secure the block assembly.
- Lock washers and staked nuts resist loosening.
- Furnished with an integrated becket.
- Satisfies ASME B30.26 requirements.
