PRODUCT DESCRIPTION

Wurtec's Quick-Release Clevis is designed to simplify rigging operations while improving safety and efficiency during elevator installation. Its integrated handle-pin design allows for quick insertion and removal while preventing the clevis pin from being completely removed, reducing setup time and helping prevent pin loss down the hoistway. The clevis is compatible with all rail sizes up to and including 30 lb/ft jumbo rails.

The Quick-Release Clevis with Rope-Retaining U-Bolt adds an integrated U-bolt that helps keep the hoist rope securely positioned on the clevis, providing an additional level of security during lifting operations.

KEY FEATURES

- Integrated handle-pin design for fast installation and removal
- Captive pin design helps prevent pin loss during rigging
- Compatible with all rail sizes up to and including 30 lb/ft jumbo rails
- Optional rope-retaining U-bolt helps prevent the hoist rope from sliding off the clevis
