

# Omega Rail Spreader

## *Instructions*

The Wurtec Omega Rail Spreader is simple easy and effective. The cam action of the spreader will spread the rail allowing you to easily install the splice tube.

## *Steps:*

1. Unscrew the bolt so that the spreader is in its smallest configuration.
2. Insert the rail spreader into the back of an Omega rail.
3. Rotate the bolt Clockwise, spreading the rail.
4. Install the splice tube, and remove the spreader.
