

CANOPY OPTIONS

FOR V1 FALSE CAR & ADJUSTABLE PLATFORM

PRODUCT DESCRIPTION

Wurtec's Canopies and Handrail Systems provide overhead debris protection and fall protection for technicians working on platforms within the hoistway. Designed for new elevator installations and modernization projects, these safety systems create a protected work area while integrating seamlessly with Wurtec Adjustable Platforms and other compatible platform systems.

Available in multiple configurations to meet a variety of jobsite requirements, Wurtec canopies combine lightweight aluminum construction with durable designs for reliable performance in the field. Select models feature a break-away design that helps prevent workers secured to a lifeline from becoming trapped if the platform travels downward unexpectedly, while compatible handrail systems provide additional perimeter protection.

KEY FEATURES

- Protects workers from falling debris in the hoistway
- Compatible with Wurtec Adjustable Platforms and related safety systems
- Multiple canopy and handrail configurations for a variety of applications
- Lightweight, durable aluminum construction for long service life
- Select canopy models feature a break-away design for enhanced worker safety
- Modular system allows canopies, handrails, and accessories to be configured for specific job requirements
