

11-409
Material Hook, Heavy-Duty, 30",
Two Handles

PRODUCT DESCRIPTION

Wurtec's Heavy Duty Material Hook is engineered for safely lifting and maneuvering heavy elevator guide rails. Constructed from high-strength 1/2 in. diameter steel, its ergonomic design improves control, reduces operator fatigue, and provides a secure grip for demanding installation applications.

KEY FEATURES

- Compatible with standard guide rail sizes from 5/8 in. (8 lb) to 1-1/4 in. (30 lb)
- Dual-handle design provides multiple lifting positions for improved ergonomics
- Center handle promotes proper lifting technique by allowing users to lift with their legs
- Large-diameter handles reduce hand fatigue during use
- Hook aligns parallel to the handles for improved control
- Symmetrical design accommodates both left- and right-handed users
