

HYDRAULIC PISTON GUIDE

Part No. 021809

Product Description

The hands-free **Hydraulic Piston Guide** is used to assist in the removal and replacement of hydraulic pistons. No more “chasing” pistons up the elevator shaft. Simply attach guide to piston and adjust connecting arms out to the rails. Centering guide will keep piston in proper position for lowering into jack casing and after the new casing and piston are installed, will guide piston up for easy re-attachment to bolster channel.

Features

- Eliminates hydraulic fluid leaks by relieving side pressure on jack seals or packing.
- Lightweight, easy to attach, saves time and money on every job.
- Adjustable for 4” to 10” diameter pistons.
- Adjustable DBG from 60” to 90”.
- Works on Standard, Jumbo and Omega rails.

Part No.	Description	Weight
021809	Hydraulic Piston Guide	35 lbs (15.9 kg)
