Lifting Bar

Lifting Bar in Context

PRODUCT DESCRIPTION

The Wurtec **Lifting Bar** provides a secure and reliable hitching point for wire rope shortening during elevator installation, maintenance, and modernization. Designed for use with Roebling or aluminum rope clamps, the lifting bar mounts directly above the clamps to create a stable lifting connection for chain hoists and other compatible lifting devices.

Engineered for strength and ease of installation, the Lifting Bar features integrated oblong lifting links that simplify hoist attachment while providing a stable lifting point during rope shortening operations. Rated for loads up to 30,000 lbs. (13,607 kg), the lifting bar is compatible with a wide range of Wurtec Roebling and aluminum rope clamps, making it a versatile solution for elevator wire rope maintenance.

KEY FEATURES

- Provides a secure hitching point for wire rope shortening.
- Compatible with Roebling and aluminum rope clamps.
- Rated for loads up to 30,000 lbs. (13,607 kg)
- Integrated oblong links simplify hoist attachment.
- Durable steel construction for demanding applications.
- Quick and straightforward installation.
- Compatible with multiple rope sizes and clamp configurations.
- Product weight of 42 lbs (19 kg)
