Part No. 70-10067750
FTC Hoist Rig

PRODUCT DESCRIPTION

The **Wurtec FTC Hoist Rig** enables you to hoist up to 700 lbs. of flat travel cable (FTC) from the bottom of the hoistway to the machine room level - safely, securely, and with no damage to the cable.

The dependable locking mechanism makes this tool a superior alternative to traditional wedge-type hangers.

The FTC hoist rig consists of:

- A **locking wedge** that prevents FTC slippage;
- A **gate** with die springs that fastens the FTC securely against the wedge and prevents any unintentional loosening;
- **Wing nuts** that allow you to tighten or loosen the gate - no additional tools needed;
- A **rated swivel hoist ring** that allows free rotation of the tool during hoisting and prevents twisting of the FTC;
- A **lanyard** to prevent the wedge from accidentally dropping during the loading and unloading of the FTC cable.

Key Features

- 700 lbs. working load limit
 - 600 lbs. of jacketed cable below the tool
 - 100 lbs. of unjacketed cable hanging over the gate
- Locking wedge mechanism that prevents cable slippage
- Swivel hoisting ring that prevents cable twisting
- Lightweight aluminum design - weighs in at just under 15 lbs.
- Simple installation and removal - no extra tools needed
- No damage to FTC
