Double-Sided Plumb Line Drop Tool

Close-up of measurement
guides etched into both
sides of the tool

PRODUCT DESCRIPTION

Wurtec's Double-Sided Plumb Line Drop Tool simplifies the alignment of elevator guide rails by allowing plumb lines to be dropped on both sides of the hoistway from a single setup. Designed to mount to plywood or other sturdy material on the sill bracket, it provides a stable, accurate reference for rail layout while improving installation efficiency.

Constructed from lightweight, high-strength aluminum, the tool is easy to transport and adjust, making it an ideal solution for a wide range of elevator installations.

KEY FEATURES

- Fully adjustable up to 121 in. to accommodate a variety of hoistway sizes
- Lightweight, high-strength aluminum construction
- Weighs approximately 25 lb for easy handling and setup
- Six plumb line attachment points for increased flexibility
- Built-in measurement guides on both ends for precise alignment
