FEATURES:

- Pedestrian barricade forms a complete barrier to protect against unnecessary pedestrian accidents.
- This barrier is considered both Type I and Type II, meeting all OSHA requirements.
- Four panel barrier sets prevent pedestrian access at the top of escalators.
- Six panel barrier sets allow for ample work space in the escalator pit area at the base of escalator while effectively preventing pedestrian access.
- Modular design for multiple applications, any number of panels can be easily connected to form square, round, rectangular or linear structures.
