

Capstan Hoist Assembly, 115V

Description

This Capstan Hoist Assembly can be used for hoisting rails and brackets, driving chain falls, pulling wire through conduit and a myriad of other chores. This lightweight powerful worker mounts just about anywhere, has 1,000 lbs. capacity and runs on 120V single phase current. Hoist assembly comes complete with foot switch REL-C-FS-1, angle mounting bracket C417-6015, rail blocks C417-6016 and rope locking device 15-308. Items may be purchased separately. For Custom Storage Boxes reference part no. 32ABC in our Material & Handling Section.

WARNING

- Always mount the hoist to the proper bracket using the high strength bolts and fasteners supplied with each hoist.
- Never operate the Hoist without the foot control.
- Never overload the hoist
- These hoist are made to lift equipment and pulling cable. Never lift people or loads over people.
- Never use a malfunctioning or damaged hoist.
- Never move a load the operator cannot see.
