

100110
Right Angle Mounting Bracket

C417-6015-4
Right Angle Mounting Bracket
with Capstan Hoist Bracket

PRODUCT DESCRIPTION

The Wurtec Right Angle Mounting Bracket is a heavy-duty mounting solution designed to securely attach a Golo Hoist or Chance Capstan Hoist to a vertical surface. Constructed from ASTM A36 steel and rated for 1,200 lbs (544 kg), it provides a reliable anchoring point for utility, confined space, and material handling applications.

The bracket's radial mounting pattern allows supported hoists to be installed facing any of four directions. Golo Hoists mount directly to the bracket and can rotate up to 45 degrees, while Chance Capstan Hoists mount using the required Capstan Hoist Bracket and can rotate up to 26 degrees.

Designed for vertical concrete or structural surfaces, the bracket offers multiple anchor mounting locations for installation flexibility.

KEY FEATURES

- 1,200 lb (544 kg) load capacity
- Mounts directly to vertical surfaces
- Compatible with Golo Hoists and Chance Capstan Hoists
- Four-direction mounting orientation with multiple anchor mounting points
- Up to 45° Golo Hoist rotation and up to 26° Capstan Hoist rotation
- Heavy-duty ASTM A36 steel construction
- Compact right-angle design

**NOTE: In some applications, it may be permissible to use only (2) 5/8" bolts or anchors, provided the installation has been evaluated by a competent engineer.*

RIGHT ANGLE MOUNTING BRACKET

ORDERING INFORMATION

Part Number	Description
100110	Right Angle Mounting Bracket
C417-6015-4	Capstan Hoist Bracket (Required for Chance Capstan Hoist Installation)

PRODUCT SPECIFICATIONS

Rated Capacity	1,200 lbs (544 kg)
Mounting Surface	Vertical Surface
Compatible Equipment	Golo Hoist, Chance Capstan Hoist
Capstan Hoist Adapter Required	C417-6015-4 (Sold Separately)
Mounting Orientation	Four Directions
Golo Hoist Rotation	Up to 45 °
Capstan Hoist Rotation	Up to 26 °
Material	ATSM A36 Steel
