PRODUCT DESCRIPTION

The Wurtec Adjustable Platform is a load-rated platform for use with the Wurtec V1 False Car (#11301).

This patented aluminum platform is adjustable for the same DBG and depth range as the False Car, and changing the configuration and size is quick and easy.

Once you've configured the size, you can secure a piece of plywood under the cleats along the inside edge to serve as the floor of the work platform.

The Adjustable Platform features a 4" (100mm) kick plate around the perimeter and is designed to accept Wurtec's canopy and handrail systems. Custom sizes are also available.

		Configuration	
		1	2
11-305-INT 81 lbs (36 kg)	Width (DBG)	47"-65"	40"-62"
	Depth	39"-58"	46.5"-65"
11-305-MID 128 lbs (58 kg)	Width (DBG)	66"-92"	57.25"-76"
	Depth	50.5"-72"	66"-87"
11-305 147 lbs (66 kg)	Width (DBG)	72"-108"	63.5"-92"
	Depth	61"-92"	76"-108"

ACCESSORIES

Support Kit (11-305-SK) (wt. 25 lbs / 11 kg) Use the Support Kit for added support when extending the Adjustable Platform beyond 7' (84") deep. It replaces the standard joist bracket that comes with the False Car and attaches to the bottom flange of the Adjustable Platform.

Handrail Post Kit (11-305-PH) (wt. 32 lbs / 14 kg) The Handrail Post Kit allows you to install a Telescoping Handrail Kit on the platform without a canopy. It attaches directly to the corner brackets on the inside of the Adjustable Platform.

SPECIFICATIONS_11-305

ACCESSORIES

Crosshead Mounting Kit (11305MK) (wt. 94 lbs / 42 kg) Use the Crosshead Mounting Kit to securely attach the Adjustable Platform to the crosshead of your car sling. It can accommodate crossheads up to 12 in high and 18 in wide. Custom sizes available.

Slant Top Breakaway Canopy (11-357 & 11-357-INT)

Telescoping Breakaway Canopy (1010019359) Both canopy styles provide overhead protection. The roof breaks away from the canopy posts in the event of a freefall. The Telescoping Breakaway Canopy can also split open at the peak of the canopy roof.

Telescoping Handrail (10-10020036, 10-10020320, & 1010020327) The Telescoping Handrail Kit provides and adjustable lateral barrier around the platform, and mounts directly to the inside of the Adjustable Platform corner brackets.
